

Silicone Fibre Cushion

Cotton/Polyester breathable cover provides maximum cool comfort

Silicone coating lubricates each fibre to reduce friction and shear force while preventing moisture penetration or retention

This seat cushion is constructed from silicone coated cylindrical fibres that retain their loft and promote airflow to the skin's surface for superior patient support and comfort.

The silicone coating lubricates each fibre to reduce friction and shear force while preventing moisture penetration or retention, making it an ideal choice for geriatric or palliative care.

Covered with a breathable cotton/polyester fabric, the cushion is fully machine washable with standard detergent.

- ☒ Excellent pressure relief and comfort on any chair or seat surface
- ☒ Fluid resistant silicone fibres provides extra support and comfort
- ☒ Ideal for geriatric and palliative care
- ☒ Flame Retardant 16 CFR Part 1632
- ☒ Fully machine washable up to 70°
