

**CODE: BQ12**

## ANALOGUE CALENDAR CLOCK WITH AUTOMATIC CALENDAR

**FEATURES:**

The industry standard for banks, offices and Post Offices, the BQ12 is also becoming more popular in the home. Like all our calendar clocks, the BQ12 is useful wherever people are completing forms and as a reminder for the day of the week for people with memory loss.

With a large analogue clock-face and day date calendar that can be read up to 15 meters away the BQ12 includes a reliable German movement and an automatic calendar function that self-adjusts for leap years. The flip card display remains readable under fluorescent lighting, unlike many LCD clocks.

**IDEAL FOR:**

Memory Impaired • Banks and Post Offices • Waiting Rooms • Home or Office • Nursing Homes
